Failed task in Schema - Passed

With Task Name in text - Passed

The screenshot displays the Snowflake web interface for a failed task. The left sidebar contains navigation options: Workflows, Sources, Accounts, Data Stores, Components, Settings, Explore, Community, Help & Docs, and Careers. The main content area is titled "Failed Task in Schema" and shows a list of events. The selected event is from 2023-06-05 at 19:20:28.438 -0700. The event details include:

- completedTime: 2023-06-05 19:20:28.438 -0700
- errorCode: 002003
- errorMessage: SQL compilation error: Table 'MYTABLE' does not exist or not authorized.
- queryId: 01acc6cc-3200-c0c4-0004-37f20002c0de
- queryStartTime: 2023-06-05 19:20:27.965 -0700
- queryText: INSERT INTO mytable(ts) VALUES(CURRENT_TIMESTAMP)
- runId: 1686018018798
- scheduledFrom: EXECUTE TASK Copy Path · Copy Value
- scheduledTime: 2023-06-05 19:20:18.798 -0700
- taskDatabase: PIPEDREAM

Below the event details, there are sections for "INTEGRATIONS" and "Workflows". The "Workflows" section includes a "CREATE WORKFLOW" button and a "View Tutorial (1 minute)" link. The "APIs" section mentions managing sources and consuming event data using REST or SSE (real-time) APIs.
