The screenshot shows the 'Settings' page for a user named 'Hung V Turing'. The left sidebar contains various settings categories: Public, Messages, Team, Styling, and Localization. The main content area is titled 'Users' and contains the following information:

- Public**: Invite your team to access your Waitwhile account along with you. Includes buttons for 'Join waitlist', 'Display waitlist', 'Online booking', 'Public locations', and 'Arrivals'.
- Messages**: Includes 'Waitlist messages', 'Booking messages', 'Saved replies', and 'Team notifications'.
- Team**: Includes 'Users', 'Roles', and 'Resources'.
- Styling**: Includes 'Theme' and 'Localization'.

The 'Users' section lists two users:

User	Role	Last Active	Action
Pipedream 2127	Editor	Oct 11, 2022, 09:30pm	Edit
Hung Vu (You)	Owner Admin	Oct 11, 2022, 09:14pm	Edit

Below the user list, there is a 'Single sign-on' section with the text 'Add SSO to improve security and restrict how your team logs into Waitwhile.' and a 'Talk to sales team' button. An 'Upgrade to Enterprise to unlock SSO' button is also present.

A notification from Benjamin from Waitwhile is visible in the bottom right corner: 'Hi Hung 🙌 Have you had the chance to explore Waitwhile? Check out this quick video tour of th...'

Search Customers - Passed

The screenshot shows a configuration and results interface for a 'search_customers' step. The configuration section includes a 'Waitwhile Account' dropdown set to 'Waitwhile' and a 'Location ID' dropdown set to 'HungVTuring'. Below these are 'Optional Fields' with expandable options for State, Tag, Query, Limit, Page, From Date, To Date, From Time, and To Time. The results section shows a success message and a tree view of the search results. The tree view shows a summary of the search, followed by a return value containing a list of results. The first result is a customer object with fields for id, name, firstName, lastName, email, phone, notes, tags, externalId, and numVisits. The interface also includes a 'Test' button and a 'Continue' button.

```

Test to deploy

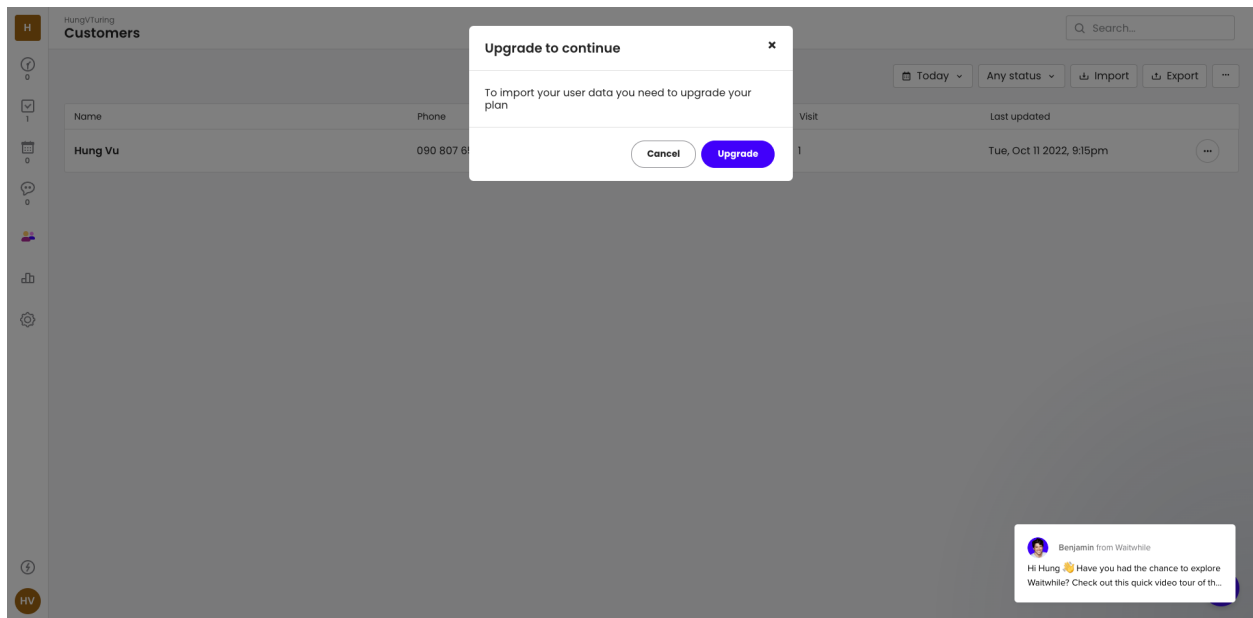

+

Expected behaviors:

- The error should show error message for me to know what's wrong with my configuration

Note:

I suspect that this error is because I'm in free tier. Free tier doesn't get to import new customer

Export Customer - Failed

I faced an error when trying to execute the action, even-though I have tried to input all optional props

```
Error  
[object Response]
```

Test to deploy

Expected behaviors:

- The action should be executed successfully
- The error should show an error message for me to know what's wrong with my configuration

Import Customer - Skipped, Improvement needed

I'm not sure how this action works

The screenshot shows the configuration interface for the 'import_customers' action. It includes a 'CONFIGURE' section with a 'Waitwhile Account' dropdown menu set to 'Waitwhile'. Below this is a 'Type' dropdown menu with a placeholder text 'Enter text and/or a custom expression (should evaluate to string)...'. Further down is a 'Location ID' dropdown menu set to 'HungVTuring 1fXJVwfji3FIONjbPy3h'. A 'Configure to test' button is located at the bottom of the configuration area.

Expected Behavior:

- The `Type` prop should have a clearer description explaining what to input
- I suspect that we need to upload a file to send to Waitwhile

List customer note entry - Failed

I faced an error when trying to publish this action

```
→ waitwhile (4057-Waitwhile-Actions) x pd publish /Users/Nguyen_Hung_Vu/Code/Personal/pipedream/components/waitwhile/dist/actions/list-customer-note-entries/

Test to deploy

Expected behaviors:

- The action should be executed successfully
- The error should show an error message for me to know what's wrong with my configuration

Remove Customer - Failed

I faced an error when trying to execute the action

```
Error  
[object Response]
```

The screenshot shows the configuration and execution of the 'remove_customer' action. The configuration section includes a dropdown for 'Waitwhile Account' set to 'Waitwhile' and a dropdown for 'Customer ID' set to 'Hung Vu KcK1So8FwwSmw9NmqpUKZE'. Below the configuration, the 'RESULTS' section shows an error message: 'Error [object Response]'. At the bottom, there are tabs for 'Exports', 'Inputs', 'Logs', and 'Details', with 'Inputs' selected. Below the tabs, there is a checkbox for 'Detailed/code mode' and a table showing the input values: 'Waitwhile Account' is 'Waitwhile' and 'Customer ID' is 'Hung Vu KcK1So8FwwSmw9NmqpUKZE'. At the bottom, there are two buttons: 'Test' and 'Test to deploy'.

Expected behaviors:

- The action should be executed successfully
- The error should show an error message for me to know what's wrong with my configuration

Remove User Invite - Failed

I faced an error when trying to execute the action

Error
[object Response]

The screenshot shows a configuration window for the 'remove_user_invite' action. It is divided into two main sections: 'CONFIGURE' and 'RESULTS'.
In the 'CONFIGURE' section, there are two dropdown menus: 'Waitwhile Account' set to 'Waitwhile' and 'Invite ID' set to 'Pipedream 2204 USjgQqylqgF73L8bRXVX'. Below the 'Invite ID' dropdown, the text 'Unique identifier' is visible.
The 'RESULTS' section shows an error message: 'Error [object Response]'. Below the error message is a 'DETAILS' link.
At the bottom of the window, there are tabs for 'Exports', 'Inputs', 'Logs', and 'Details'. The 'Inputs' tab is selected, showing a table with the following data:
| Waitwhile Account | Waitwhile |
| Invite ID | Pipedream 2204 USjgQqylqgF73L8bRXVX |
Below the table are two buttons: a blue 'Test' button and a grey 'Test to deploy' button.

Expected behaviors:

- The action should be executed successfully
- The error should show an error message for me to know what's wrong with my configuration

Resend User Invite - Failed

I faced an error when trying to execute the action
