Deployment to Pipedream2126 🕐 Finished today at 14:43 Took 5 seconds ⬤ Started by Hung Vu **Completed**

START COMMIT
pretty
644af407 John Papa 04 May 2020 13:27

END COMMIT
Node!!!
12828c0d Hung Vu 24 Oct 2022 14:43

Preparing

✓ Waiting for an available deployment slot

✓ Performing pre-deployment checks

Checking access to repository
Checking start and end revisions are valid
Checking connection to server Pipedream2126

✓ Preparing repository for deployment

Updating repository from https://github.com/vunguyenhung/node-hello.git
Getting information for start commit 644af4
Getting information for end commit 12828c

Building

✓ Checking out repository for deployment

Checking out working copy of your repository at 12828c (master)

✓ Generating deployment manifest

Transferring

✓ Transferring changed files

◯ Show file destinations?

Uploading index.js

Finishing

✓ Delivering webhook notifications

Delivered integration payload to https://2855fcc3af6fab7bc0669016795e48a5.m.pipedream.net.

✓ Sending emails

✓ Saving build environment

Saved build environment language versions

Rollback to this deployment

INTEGRATIONS

Workflows

[CREATE WORKFLOW]   **View Tutorial (1 minute)**

- Trigger serverless workflows on each event
- Write Node.js and use any npm package, or use community-built actions
- Use OAuth tokens and API keys with managed auth for 200+ apps

APIs

Manage sources and consume event data in your app using REST or SSE (real-time) APIs.

▶ REST
▶ SSE
